

Become an advocate of change in healthcare!

**Join the new professional master's degree
programme “Well-Being oriented Healthcare”.**

Discover an international network of healthcare professionals and learn how to place well-being at the heart of healthcare through a person-centred approach. Designed specifically for working professionals, the programme enables you to continue your career while studying in an international, interdisciplinary learning environment delivered by **five renowned European universities**.

Co-funded by
the European Union

Programme at a glance

- **Programme objectives:** This programme places well-being at the centre of healthcare amid rapid demographic change and rising demand for person-centred care. It brings together professionals from diverse disciplines and health systems in a unique European setting, providing the knowledge, practical skills, and ethical foundations needed to deliver compassionate, comprehensive, and sustainable care for patients, caregivers, families, and healthcare staff.
- **Format:** part-time, blended programme with mainly virtual classes and one short-term mobility per semester in Cologne (Germany), Budapest (Hungary), Murcia (Spain) and Florence (Italy)
- **Target group:** healthcare professionals with at least 12 months of professional experience in a related field.
- **Language:** English.
- **Duration & ECTS:** 4 semester, 60 ECTS.
- **Tuition fee:** 5,000€ for the entire programme.
- **Application deadline (cohort 2026/27):** 3 September 2026.
